

Description

LossShield PZ is a *Single Sack* Loss Control Material formulated for Pay Zone applications. It comprises of In Situ formed Acid Soluble Fibers. The LCM can be effectively used to address losses across 1000 μ to 5000 μ apertures. Being acid soluble at >95%, it lends itself particularly well to Pay Zone applications. *LossShield PZ* has been shown to be effective when tested across 3 x 1000 μ , 3 x 3000 μ and 3 x 5000 μ slot discs, 30 min duration, with 500psi differential pressure.

Acid Solubility of >95% has been tested in the laboratory using 15% Hydrochloric Acid.
